System Set-Up

1. **IMPORTANT:** When connecting the Camera to the Monitor the power must be off or both units will be damaged.
2. Screw the Camera to the Wheel Cable (See Figure1-A) & Connect the Wheel to the Monitor (See Figure 1-B).
3. Plug the Power Adapter cord into the wall AC socket and the other end into the DC 12V-Input Jack to power the unit from the mains supply. Or, if powering the unit from the battery pack, screw the fuse provided into the side of the pack and plug the cord from the Battery Box into the DC 12V-Input Jack (See Figure1 - C).
4. Turn on the **POWER** Switch on the front of the Monitor.
5. Gently lower the Camera into a pipe duct, etc and reel out the Cable until it is at the desired depth.
6. Turn on the **LED** Button & adjust the Brightness from the MENU.
7. Record the pictures if you need (see DVR Operating).
8. Via a video cable you can transfer the picture to another larger screen.
9. When finished, carefully remove the Camera from the pipe duct, etc. Screw out the Camera and clean it with a clean, soft and dry cloth, then put the Camera back to the previous position.

Figure 1

DVR operation

1. Set the Screen **AV** Button to Video 2.
2. Take off the isolation sheet from the Remote Control Battery.
3. Press the Remote Control Button 5  to Enter the Recording system, then you will see the DVR system **PLAY VIDEO** manual on the screen.
4. Insert your USB recorder (USB flash or removable hard disc etc) into the **USB Port**, whereby you will see **USB CONNECTED** on the screen & the **USB** LED light turn on.
5. Press Remote Control Button 3  to start the recording & the **RECORDING** LED light will turn on.
6. Press Remote Control Button 7  to stop the recording.
7. Press Remote Control Button 1  to review the recording.
8. If you need to manage your recording pictures, press Remote Control Button 4  . Also you can undertake file management by selecting the **SETTING** on **PLAY VIDEO** manual on the screen.

LED indicators

- 1) REM : Remote receiving window
- 2) Power: It Indicates that the system is on
- 3) Recording: It will blink during recording
- 4) USB: It indicates USB device is connected
- 5) Error: It indicates the system or USB device has an error
- 6) IR: It blinks when remote control is in use **Recording Video**

The recorded video files will be found in a directory of USB devices.

User can use the on-screen menu or press (REC) button to start recording.

Press (■/EXIT) button to stop recording. During the recording, TV screen will display recording time and time limit (up to 3 hours).

User can press [setup] button to change recording time limit from 1 to 180 minutes. The recorded content can be viewed from a computer. (See chap 9 for more details)

Recording time limit

Some users may forget to stop recording after it has been initiated. Therefore the unit has a recording time limit feature whereby the default time limit is 2 hours. The user can go to SETUP mode to increase or decrease the limit from 1 to 180 minutes.

Schedule recording

User can schedule a recording in advance. Simply enable the schedule recording in the SETUP. Then the unit will ask user to setup timing. (See chapter 6 for more details.)

The recording schedule can be used only once, as the user has to set up the schedule again for the next recording.

Recording to USB device

The unit is able to record video into USB devices such as a USB hard disk. The recorded video will be stored in the USB device and can be played back on the TV screen.

Recording format

The default recording resolution is 640*480, which takes about 500MB/hour.

User may select 320*240 to save storage space.

Video play

User can use the on-screen menu to enter “play video” mode. The unit will display the recorded video and other compatible videos inside the USB device.

It will not list the non-compatible videos.

Select the video file.

When the user enters “play video” mode, the set will display all of the available video files on the TV screen.

User can press [▲] or [▼] button to select desired video and press [▶/ENT] button to play.

Press and hold [▲] or [▼] button to go to previous or next video.

Use [▶/ENT] button to start or pause the playback. Use the [■/exit] button to stop or go back to the previous menu.

The screen will display “loading, please wait ...” for a few seconds before playing video.

Fast forward and rewind

User can use [▶] or [◀] button on the remote control to fast-forward or rewind (1x, 2x, 4x or 8x speed). Always press [▶/ENT] button to go back to normal playing.

Compatible video format:

Divx3.11/Divx4/Divx5/MPEG1/MPEG2/MPEG4 (MPEG4 video file format: .avi, .m4v, .MPG, MPEG, .VOB)

Note: Video does not support any downloaded video content.

System setup

User can select different standards, recordings and other features during setup.

Also, the user can upgrade the unit firmware or restore to factory default settings.

Recording setup

Recording time limit: 00:00-03:00(default is 2 hours)

Video standard: PAL or NTSC (default NTSC)

Resolution: 640*480,480*360,720*480 and 320*240(default 640*480)

Compression rate: 1000, 1200, 1500, 1800, 2100, 2500KB/S (default 1000kb/s)

Sample frequency: 24.32khz(default 32khz)

Schedule recording: on/off (default off)

Recharge

- 1) Plug the AC cord into wall AC socket & insert the other end into the Battery Box AC jack (See Figure2-A)
- 2) Press the charge switch (See Figure2-B)
- 3) The charge LED will illuminate red during charging & will turn green once charging has been completed (charging time normally 8-10 hours).

Figure 2

Do not overcharge the battery; overcharging can result in damage to or acid leaking from the battery.

Assembly drawing and parts list

Part No.	Description
1	CAMERA
2	MONITOR
3	60 FEET CABLE WITH WHEEL (LONG)
